

27-03-2017

I am self motivated ,reliable and responsible person.I have an active and dynamic approach to studies.I try to identify and develop opportunities.Self knowledge that I have gained over last few years makes me clear that mathematics is the right choice.I think my dreams are half filled.I am adaptable to all challenging situations.I strongly believe that real purpose of knowledge is applying it in the real life.I want to pursue new heights through knowledge.I have a keen to learn and improve skills.

It is because of my mother's prayers and hardwork I got admission here in St.Stephen's College. I am a Sumitomo Scholarship holder .Sumitomo Cooperation India-St.Stephen's Scholarship is a merit-cum-means scholarship consisting of a grant of US \$500.I was awarded this scholarship for the academic years2016-18 ,based on my academic performance.I got World Brotherhood Organisation Scholarship.It is an educational award of Rs.20,000/- for girls for educational purposes,based on their merit and financial status.

I wish to do internship with an organisation that offers me an opportunity to learn and contribute in a professional environment.I am a member of Social Service League Evening class of our college.Here we spend time to teach the underprivileged children.They are the children of college workers.We also teach the students from the nearby areas.

I got a chance to attend the workshop onTeaching-Bridging The Gap organised at Indian Institute of Technology,Delhi by Teach For India.It mainly focussed on how to teach children.Ialso attended the Environmental Health Sensitization Workshop held at St.Stephen'sCollege,to learn about preventing environmental degradation and maintaining cleanliness and hygiene.

By doing such things we get a sense of satisfaction that surpasses all understanding.It also involved in working for the upliftment of the underprivileged sections of the society in and around college.It is my pleasure and great privilege to be a part of CLIX led by the Tata Institute of Social Sciences.Like the evening classes of our college I think CLIX is also an innovative field to improve the professional and academic prospects of high school students from undeserved communities in India.

I passed grade 3 piano from Trinity College London. I use to play hymns in my church.And I do paintings,drawings and sing songs.

We can make our country more literate by giving them proper guidance in education.Let our country shines more brightly.Today's youth are tomorrows adult.They are going to lead the country.Children are future builders of the nationThey are the real asset of the nation.Literacy helps a nation in her economic development,socialprogress,political progress, and scientific and cultural progress.

My ambition is to become a professor .The sole object of my life I to lead a life of simplicity and goodness devoted to the service of others.I wish to do what I can to educate my countrymen.I have nurtured a love for young children from my childhood.

“WISDOM WILL ADD YEARS TO YOUR LIFE”

Kindly,consider my application

Thankyou
